

RETAIL SERIES

R2000

Retail, Cash, Coupon and Token Counter

RETAIL ENVIRONMENTS NEED DOWN-TO-EARTH BUT COMPREHENSIVE CASH COUNTING SOLUTIONS. FASTER AND MORE ACCURATE THAN HAND COUNTING, R2000 OFFERS SIMPLE CASH RECONCILIATION AND AUDIT FUNCTIONALITY FOR COINS AND NOTES AS WELL AS GIFT VOUCHERS AND TOKENS.

The R2000 is designed for businesses that want to streamline their cash processes for tighter control and more time for other tasks. It can count a till (including gift vouchers and tokens) and prepare a float in a single operation in under a minute. Faster counts enable more audits and checks to be made, and a complete audit trail can be created, giving managers information that can be swiftly acted on when discrepancies occur. The R2000 can also connect to a Tellermate printer for production of mini reports that can be signed for accountability.

Preparing cash for banking is quicker as the full bag and full bundle mode alert the user to errors, ensuring that deposits are correct first time and giving an instant view of takings.

“Installing Tellermate has radically improved and simplified our cash management, and has increased cash reconciliation speed and accuracy. Cash is better consolidated and the power of integration has given us cash visibility and audit ability.”
